

ZOLL AED Plus

Description

The ZOLL AED Plus® is the only Full-Rescue AED that supports both CPR and defibrillation. For infrequent rescuers, the AED Plus supports the complete chain of survival. The unique graphical user interface – pictures combined with text displays and voice prompts – helps the rescuer perform every important life-saving action every step of the way.

AED Plus features Real CPR Help®, a tool to help the rescuer achieve the correct rate and depth of chest compressions during CPR through visual and voice prompts. Feedback such as "PUSH HARDER", "GOOD COMPRESSIONS" and an adaptive metronome to guide compression rate help accomplish quality compressions.

Key Features and Benefits

- Real CPR Help® - the only AED that assists with CPR compression depth and timing and leads to more effective CPR delivery
- Graphical and audio prompts through emergency
- Single piece electrodes – reduces chance for incorrect pad placement
- 7 day self check – unit self checks every 7 days – visible/audible alarm
- 5 year battery and electrode life – regular lithium batteries last 5 years
- Pediatrics – Pedi-Padz® quickly converts unit to child suitable (under 8 years)
- Downloadable data – emergency event data can be downloaded to PC for analysis

Key Specifications

Size (H x W x D): 13.3cm x 24.1cm x 29.2cm

Weight: 3.1kg

Waveform: Rectilinear Biphasic™

Energy: Automatic pre-programmed (Adult: 120J, 150J, 200J; Pediatric: 50J, 70J, 85J)

Time from Rhythm Analysis to Shock: 14 sec new batteries; 15 sec depleted batteries

Battery Capacity: Typical new battery stand-by life 5 years, or 300 continuous shocks, or 13 hours continuous monitoring
